Eliezer A Meza

Fullstack Developer

📞 +584122970632 | @ eliezermeza.dev@gmail.com | 🔗 portfolio

Professional Summary

Full-Stack Web Developer with 4 years of experience in creating systems and software solutions for small and medium-sized enterprises. Specialized in developing hybrid applications and designing modern, scalable, and optimized interfaces. Experienced in multidisciplinary teams focused on implementing efficient solutions adapted to business needs.

Experience

Kodea Labs   April 2025 - Present
Mobile Developer   Remote
🔗 https://www.kodea.la/

- Led the end-to-end development of cryptocurrency wallets for iOS and Android, shaping both the user interface and the platform's critical functionalities. Ensured **optimal and secure communication with the backend via a RESTful API**.
- Developed the applications using **GetX** for efficient and scalable state management. Solved complex compatibility challenges by **creating forks and customizing pub.dev packages**, ensuring the integration of advanced features.

Main tech stack: *Flutter*

Spartan Techs C.A.   Oct 2021 - Mar 2025
Software Developer   Porlamar, Nueva Esparta
🔗 https://grupospartan.com/

- Developed and implemented new **project management strategies** based on requirement analysis from **over 15 clients**, achieving a **20% optimization in development cycles**.
- Designed and developed **enterprise applications** for **over 200 active users**, integrating **advanced features** such as inventory control and cost analysis.
- Actively contributed to **Frontend and Backend development** teams, implementing full-stack solutions that improved code cohesion and **reduced integration errors by 15%**.

Main tech stack: *Ionic/Angular, React, Nextjs*

Consulting Projects

Novanet Studio C.A.   Nov 2024 - Present
Fullstack Developer   Remote
🔗 https://novanet.studio/

- Optimized the performance of **5+ existing web platforms**, implementing improvements that resulted in a **direct 20% reduction** in their loading times.
- Developed and integrated **c2p payment modules** into existing ERP systems, processing **+200 daily transactions** and achieving a **60% efficiency improvement** in customer invoice closing.

Main tech stack: *Nuxt, Bunjs, Strapi*

Skills

Frontend   **Backend**

HTML5, JS (ES6+), React, Vue, Angular, Ionic, SCSS, Tailwind, Flutter   Nextjs, Bunjs, Strapi, PostgreSQL

Education

Universidad de Margarita   Sep 2018 - Nov 2023
                                                                                                  Systems Engineering

🔗 https://portalunimar.unimar.edu.ve/

- Graduated with honors on my degree thesis by developing an internal process management system for a technical service department.

Languages

Spanish - Native   **English - B1**

                                                                   Professional proficiency for technical reading and written communication.
